

Charlie Trenorden

Sydney NSW · charlie.tren@gmail.com · linkedin.com/in/charlietrenorden · charlietrenorden.com

Market analyst at Rochford Capital, advising institutional clients on hedging and running the competitive bank processes behind it. Self-directed equity research since 2018, now a Python platform that screens, values and holds every position to a written thesis. Double degree in computer science and finance from QUT, with distinction. MComm (Economics) in progress at USyd, CFA Level I candidate.

EXPERIENCE

Market Analyst Rochford Capital

Sydney | Sep 2025 to present

- Personally cover 20 client relationships across asset managers, private equity, credit and infrastructure, advising on FX, rate and commodity hedging.
- Run competitive bank pricing processes, pitting vanilla swaps against caps, collars and cross-currency structures on all-in cost and mark-to-market impact, then coordinate execution through to novation.
- Stress-test client covenants (ICR, DSCR, net leverage, LTV) under rate, FX and earnings shocks, then size hedge ratio and tenor to whichever covenant binds.

Market Ops & Automation Analyst Lazarus Capital Partners

Sydney | Jan 2025 to Sep 2025

- Produced equity and macro research for the trading desk and prime brokerage clients, delivered as the daily morning note.
- Automated trade reporting and risk exposure monitoring in Python and Excel/VBA, cutting more than 50% off a daily reporting cycle. Built the P&L attribution, exposure and liquidity dashboards used daily by the desk.

INDEPENDENT EQUITY RESEARCH

Self-Directed Equity Research own portfolio across ASX, US and Japan

2018 to present

- **Lighthouse.** A Bloomberg-connected (blpapi) research platform built to enforce my own process: nothing is sized until a pre-trade checklist passes, and every close writes a postmortem against the original thesis.
- **Screening and valuation.** A multi-factor screen scoring companies against industry peers on returns, cashflow and moat durability, paired with a DCF tool that reverse-engineers what a price already assumes.
- **A position in detail.** Long santec (6777 JP) since May 2025: a pricing-power niche in optical test, bought cheap against its own history ahead of the Japanese small-cap re-rate. Scaled in across three tranches, trimmed two thirds at +193% and +234%, still holding the balance at +248%.
- **Writing.** Thinkerings, an essay series on business strategy and market structure, plus live market tools at charlietrenorden.com.

EARLIER EXPERIENCE

Senior Information Technology Officer Public Trustee of Queensland

Brisbane | Jan 2024 to Jan 2025

- Ran infrastructure projects across vendors and executive sponsors. Competitive tenders and renegotiated terms delivered roughly 15% in cost savings, no date missed.

EDUCATION

Master of Commerce, Economics University of Sydney

2025 to 2027

- Part-time alongside full-time work. Econometrics, macro analysis and financial economics.

Bachelor of Business (Finance) with Distinction, and Bachelor of Computer Science QUT

2019 to 2023

- Dean's List 2020. Executive member of the QUT Trading and Investment Club and the Student Managed Investment Fund.

CERTIFICATIONS & SKILLS

- **Certifications.** CFA Program Level I candidate, sitting November 2026. RG146 Tier 1 in Foreign Exchange, Securities and Generic Knowledge.
- **Tools and modelling.** Bloomberg Terminal and API, advanced Excel (VBA, Power Query, Power Pivot), Python (pandas, blpapi, Streamlit), SQL. Company valuation, DCF and reverse DCF, multi-factor screening, derivative and hedging structures.
